Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2 and 5 have been rejected under 35 U.S.C. 103(a) as being unpatentable over Edwards, D177967, or Bedazzle jewelry website in view of Roman Intaglios and Cameos webpage.

Edwards and Bedazzle jewelry both disclose that it is old and well known to make a finger ring in the form of a Mobius strip, wherein the strip is a flat rectangle in cross section. The claims require that the cross section of the ring to be triangular.

The Roman Intaglios and Cameos webpage (see 171) discloses that rings having an oval hoop of a thin band with a triangular cross section were known in ancient times. Also, the courts have noted that a change in shape of an element is obvious to one having ordinary skill in the art.

It would have been an obvious design choice to a person having ordinary skill in the art to form Edwards's or Bedazzle's rectangular cross sectional ring with a triangular cross section in order to improve or change the aesthetical appearance of the ring.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2 and 5 have been rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what is meant by the limitation that the ring rotates about the circumferential axis multiples of 120 degrees that are not 360 degrees or multiples of 360 degrees. The ring does not rotate at all. The ring is a fixed stationary ring of metal. There are no rotating parts. Also, 120 degrees is a multiple of 360 degrees, i.e., $120 + 120 + 120$ is 360.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
